OBJECTIVE

Graduate Intelligent System Engineer with hands-on experience in **Data Annotation, AI Engineer and Full Stack Development**. Proficient in **AI Automation, Data Processing and Software Unit Testing** with experience in designing and supporting scalable data-driven solutions. Passionate about contributing to software development and intelligent automation projects within a professional organization.

WORK EXPERIENCE

TDCX **(September 2025 – July 2026)**
Data Annotator Specialist, *Full Time*

- Annotated high-quality English audio content by transcribing and labeling speaker roles and emotional tone
- Transcribed audio content accurately and applied appropriate labels to support the development of language-based datasets
- Consistently achieved ~97% annotation accuracy, exceeding the 95% KPI benchmark
- Contributed to specialized projects due to strong performance and contributions

Aga Touch M. Sdn Bhd (**March 2025 – June 2025)**
Artificial Intelligence Engineering, *Internship*

- Designed and implemented AI automation pipelines using n8n, reducing manual data handling by ~70%
- Conducted advanced prompt engineering using ChatGPT, DeepSeek, Gemini, Mistral, and Ollama to improve AI-generated outputs for internal applications
- Built AI-driven data collection pipelines from social media data from Twitter, Reddit and other forum websites for sentiment analysis
- Developed text-to-speech and AI video generation solutions for internal product applications
- Annotated video-based object detection datasets using Label Studio for YOLOv8 training

Bluevy PLT Sdn Bhd (**September 2022 – March 2023)**
Full Stack Developer & Unit Testing, *Internship*

- Resolved live production bugs and performed troubleshooting to maintain application stability and functionality
- Created and maintained 20+ unit tests to validate backend service functionality, improving code quality and reducing regression issues
- Maintained web application features using Laravel, Vue.js, and Node.js

EDUCATIONAL BACKGROUND

Universiti Teknologi MARA (UiTM) Shah Alam, Selangor
Bachelor of Science (Hons.) Intelligent System Engineering **(March 2023 – June 2025)**
CGPA: 3.51

Universiti Teknologi MARA (UiTM) Raub, Pahang
Diploma in Computer Science **(October 2020 – March 2023)**
CGPA: 3.49

PROJECTS & ACHIEVEMENTS

Media Creation - Data Collection and Research (2025)

- Conducted sentiment analysis on public discussion from Twitter, Reddit and other forum websites using Python Scripts and Julius AI
- Utilized LLMs (ChatGPT, DeepSeek) to identify and validate relevant sources for content creation.
- Compiled structure insights in Obsidian to support downstream storyboarding and media production

Extracting and Modelling Geographic Information of Agriculture (2024)
Final Year Project

- Builds a crop predictive model using soil, weather and crop data in Malaysia
- Integrated soil, weather, and crop datasets for predictive modeling using Random Forest, SVM, ANN
- Visualized insights in Power BI through interactive dashboards and geospatial maps

Adaptive Task Manager (2024)
Top 10 Finalist, IBM's BridgeHack-to-Industry challenge

- Developed a generative AI-driven task planner using IBM Watsonx for real-time automation
- Pitched and demonstrated AI automation for knowledge work, aligned with enterprise needs

SKILLS

Programming : Python, PHP, JavaScript, SQL, Java, C++
Web Development : Laravel, Vue.js, Node.js
AI/ML : TensorFlow, Hugging Face Transformers, Pandas, Scikit-learn, PowerBI
Automation & Workflow : n8n, Google Sheets API, Cloudflare R2, Microsoft Excel
Tools & DevOps : Git, GitHub, Docker, Obsidian

CERTIFICATES

- Introduction to Intelligent Virtual Agents (IVAs) with IBM watsonx Assistant
- IBM Watsonx Orchestrate: Build an AI Assistant
- IBM Watsonx.ai Technical Essentials
- Enterprise Design Thinking Practitioner (IBM)
- 5G Pioneers program (ERICSSON)
- N8n: No Code AI Agent Builder (Simplilearn)
